

How to connect eduroam in IOS

1. From the IOS settings screen

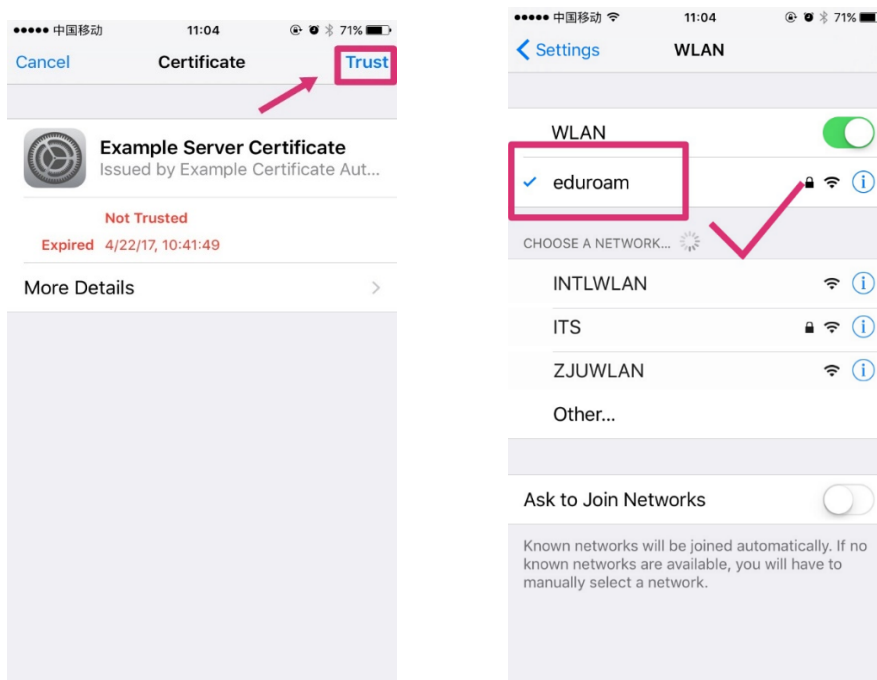

- Turn on WLAN
- Ensure the WIFI coverage and select 'eduroam'

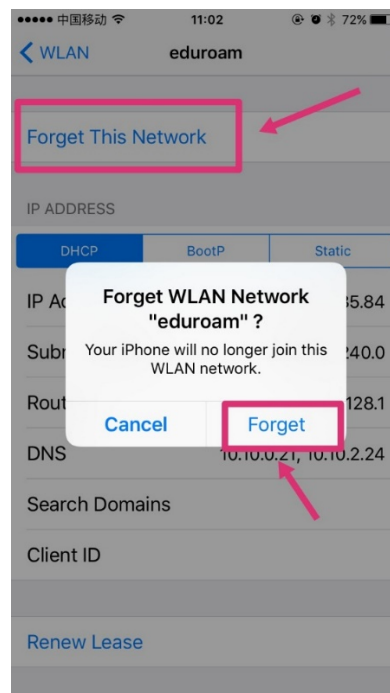

2. Input your INTL ID and password to join the WIFI

3. Successfully Connect eduroam after choosing 'Trust'

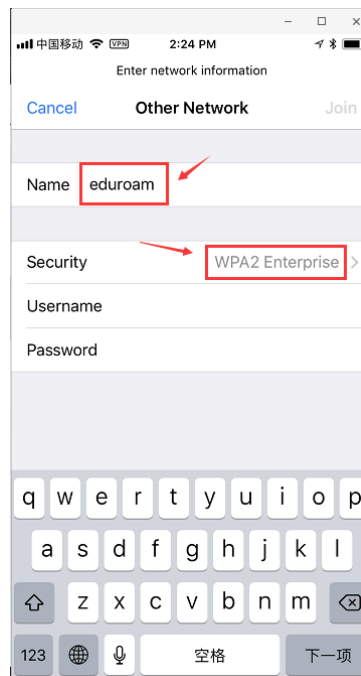

4. If you have connected 'eduroam' before but it doesn't work, you may have to forget it first. For example, if you change your password.

5. Select 'other' in the network list

6. Change the Name to eduroam, change Security to WPA2 Enterprise, then join the internet with your INTL ID and password.

7. Successfully connect eduroam after choosing 'Trust'
